---

## Summary of Qualification

Self-motivated, creative and resourceful bilingual (English/Chinese) banking consultant recently turned data analyst seeking an opportunity to use my knowledge in data analytics to gather, transform, analyze, interpret, present and visualize data for a company to grow, expand, formulate and strategize company's mission and values.

## Technical Skills

Languages : RPG, RPG IV, RPG/400, RPGLE, CL, CLLE, Python, Pandas, VBA, JavaScript, R, HTML/CSS/Bootstrap, embedded SQL, COBOL, Excel, dashboard, NLP and pySpark.

Platform : Iseries, AS/400, windows, Heroku app, AWS-S3/RDS/EC2,

Tools : Git, MQ series, FTP, webscraping, splinter, beautiful soups, selenium, Matplotlib, API, scipy-stats (for ttest/p-value), plot-ly, mapbox, leaflet, D3.js, dashboard, SQL alchemy, machine learning – sklearn, ZEPL, industry pipelines and MRjob.

Databases : relational database, SQL, MySQL, SQLite, geojson, json and Mongo.

## Data Analytic Projects

- Tableau project showing the New York City bike ridership : <https://public.tableau.com/profile/moemily#!/vizhome/NYCBikeRidership-forfuturegrowth/Story1>.
- A group project with three other members to study Miami crime (using jail booking data from 2015 to early 2019) – the app shows different tableau dashboards that analyze crime rate/types by cities and age of criminals, homeless individuals' crime and machine learning models (sklearn) for the crime data. I worked on the flask app, the HTML/CSS, added tableau to HTML seamlessly, did the homeless story and the tableau graphs and hosted it to AWS EC2.

This app is hosted in AWS EC2 : <http://18.218.187.124:5000/>.

- An app to showcase an interactive dashboard that displays the various bacteria in a selected belly button visualized in a bubble chart, a pie chart and a gauge chart. It is hosted in Heroku app while using SQL alchemy, javascript, HTML and flask app.
